

The Right Connection®

# **Cast Steel Gate Valves**

21/2" - 24"

Gate Valves ANSI/API Class 150-600: our bellows technology keeps corrosive or harmful atmospheric conditions from entering the process.

interior cut-away

## **Applications:**

Use in applications where leakage into or out of the valve is unacceptable such as heat transfer oil, toxic fluids, steam, and regulated media.

#### Features:

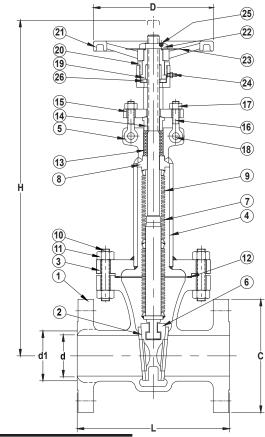

- Inconel™ bellows provide longer life and maximum corrosion resistance
- Zero stem leakage eliminates media loss and satisfies environmental regulations
- Zero maintenance results in lower operating costs; no downtime
- Reduce monitoring costs
- Three stem seals for safety: metallic bellows, graphite packing, backseat in open position
- Hardfaced Stellite® six seating surface provides long life
- Additional alloys, trims, and other end configurations available
- Class 150 Class 600 available
- Consult factory for stainless steel products in larger valves

### Specifications:

- Valve tested to ASME B16.34 / API 598
- Meets MSS SP-117
- 5 year bellows warranty

## **Materials**

# **Warning & Safety**

Dixon Eagle valves are designed to work safely for their intended use. Failure to know and understand the intended use or to consider the size, temperature, application, media, pressure and manufacturers recommendations when selecting the proper valve assembly components can result in accidents and injuries, including death and serious and permanent injuries. Dixon® recommends that all valve assemblies be tested in accordance with ASME and API recommendations and be inspected regu-

larly to ensure that their use remains appropriate and that they are not damaged.

At no charge, Dixon® is available to consult, train, and recommend the proper selection and application of all valves we sell. We strongly recommend that distributors and end users make use of Dixon's Testing and Recommendation Services. Contact Dixon® to learn more.
